## Profile Summary

Currently leading the development of truedot.ai. I am a Full Stack Developer with 10 years of experience in Python, Go, C#, Django, node.js, React, SQL, Mongodb, GoLang etc. Owned production scale services at Myntra. Lead the tech team at a fast-paced SAAS startup while working at Orgzit. Won Zynga's India level Hackathon in 2020.

## Work Experience

**Principal Engineer at Truedot, Inc.** **Oct'23 - Present**

- Leading the technical architecture design for a high-impact, pre-launch startup in the survey space
- Collaborate with founders and key stakeholders to convert business requirements into a scalable and secure technical roadmap
- Define and implement best practices for software development, infrastructure, and DevOps to ensure agility and code quality

**Senior Software Engineer 1 at Zynga Game Network India Pvt. Ltd.** **Sep'20 - Oct'23**

- Incremental revenue uplift of 250K over 6 months by leading a pod of 3 devs on a new feature
- Increased ARPDUU ~10% by working in a team of 2, building the Battle Pass feature
- Core tech upgrades for Zynga ads integration which involved replacing old ad mediators and supporting new ad networks
- Built an Explorer mini game that brought 35% higher revenue than other events

**Senior Software Engineer at Myntra Designs Pvt. Ltd.** **Jan'19 - Sep'20**

- Architected and supervised development of a real time analytics dashboard with multi tenant support using Apache Pinot increasing efficiency for multiple services
- Owned & operated a service for sending notifications/SMS to the entire user base with customization using React.js, node.js, MySQL improving reporting and turnaround time by ~50%. Managed stakeholders (PM, marketing team etc.) directly from design to delivery.
- Build a trigger based automated communication(email, feed etc.) service using GoLang and MongoDB increasing efficiency while reducing hardware requirements by 30%
- Remodeled a service for outside communications improving throughput to 22 million in 3 minutes

**Technical Lead at P3 Infotech Solutions Pvt Ltd (Orgzit)** **Nov'16 - Oct'18**

- Managed the technical team in planning, development and review
- Built PDF generation to be used for invoice, warranty card etc. reducing operational cost for clients
- Built site-wide search with access control using ElasticSearch improving performance by 10x
- Designed automated sending of SMS
- Architected Live Demo mode for public/anonymous users before signup
- End-to-end development using Tastypie and Backbone.JS, FCM (Push-notifications), Websocket
- Developed a widget for online form / data collection that can be embedded on any website
- Designed and developed dynamic email ID generation / sending / receiving using AWS SES
- Built Orgzit android App features like Caching, Search, Websocket improving load times by 2x
- Designed AmCharts integration support for WebView in Android

**Software Developer at Blackfoot Technologies Pvt Ltd (WeddingOnClick)** Oct'15 - Nov'16

- Created Android apps: Customer App, Vendor App, Wedding Manager App
- Worked on end-to-end development using Django and Android
- Google Cardboard integration -- 360 degree view of places
- Payment Gateway Integration / Job Scheduling (Celery and RabbitMQ) / Web Scraping

## Skills

Strong foundation of Backend, Frontend, Android and Object Oriented Programming

| | |
|---|---|
| Development | C#, Python, Django, Node.JS, JS, React, GoLang, Java, Android, HTML5, C, C++ |
| Database | Mongodb, PostgreSQL, MySQL |
| Stacks, Tools | Redis, Websockets, RabbitMQ, Kafka, AWS, Elasticsearch, Nginx, Git, Ansible, Celery, Supervisor, Gradle |

## Achievements & Recognitions

Certificate of appreciation in recognition of outstanding contribution for Webforms feature - Orgzit
Certificate of appreciation in recognition of outstanding contribution for QA Checklist feature - Orgzit
Microsoft Technology Associate : HTML5 Application Development Fundamentals
CS50X, An online course provided by Harvard University through EDX
High Impact workshop on Android by HCL Learning, April 2014

## Education

Post Graduate Diploma, Computer Application 2020 - 2021
Annamalai University
Bachelor in Technology, Computer Science Engineering CGPA - 6.77 / 10
Lovely Professional University, Phagwara, India 2011 - 2015

## Academic / Self - Initiated Projects

Bingo (Game), bingo.ishan1608.space May'17

A multiplayer web based game (having gamepad support) with independent rooms for multi sessions using HTML5 Canvas and Socket.IO

PrettyPrintHTML5Rocks, http://ishan1608.github.io/PrettyPrintHTML5Rocks/ Dec'13 – Feb'14

A google chrome extension to prettify and print articles from http://www.html5rocks.com

YouthVibe, https://github.com/ishan1608/YouthVibe Aug'14

Android app & server developed using nodejs and MongoDB for the college's techno-cultural festival.

Adobe Brackets (Contributor), github://ishan/brackets/ Jan'14

Contribution to open source code editor by Adobe named Brackets
